The Red Gum Expander - 2 bedroom

Expander Range – Flexible Living That Works

The Expander range redefines tiny home versatility with adaptable designs that suit any lifestyle. Whether you're after a stylish, compact caravan or a fully functional off-grid cabin, the Standard Expander is a practical, cost-effective solution.

At 37sqm, these expandable cabins can be set up almost anywhere. They are designed to be off-grid ready or easily connected to services, giving you the flexibility to live the way you want. With our nationwide branch network, delivery across Australia is simple and convenient.

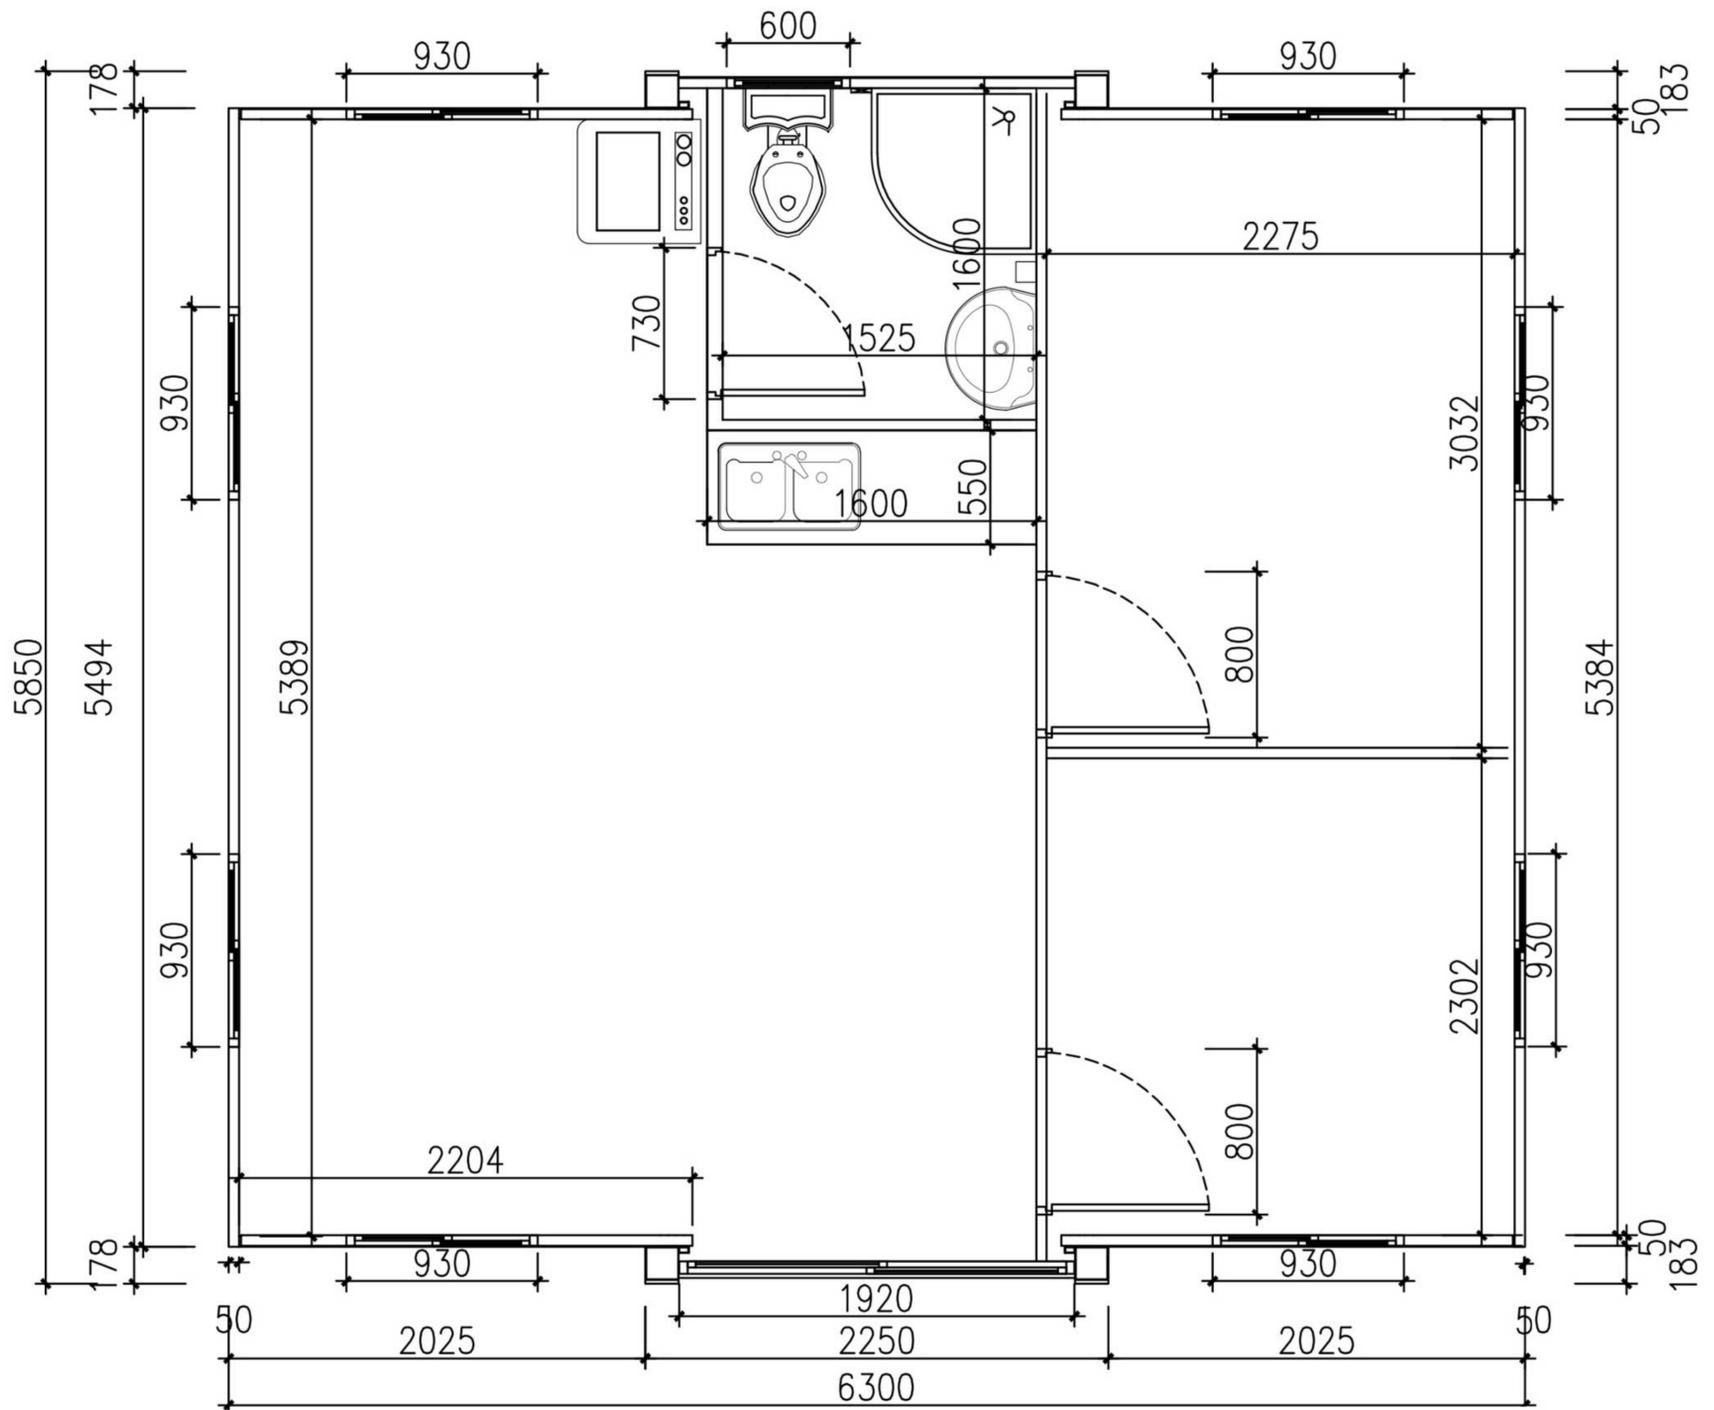

When paired with one of our trailers, an Expander unit is classified and certified as a caravan, allowing setup in many LGAs without council approval (some councils may require permission for sewer connections). Despite their compact size, Expander homes come complete with all the homely features you need — combining style, comfort, and affordability in one efficient package.

- Red Gum features include:**
- Easy set up & installation
 - Detailed step by step instructions
 - 1 piece fibreglass cover on side roofs
 - 3mm steel plate over main pod roof
 - Fully plumbed bathroom/kitchenette
 - Stone effect benchtop (silica free)
 - Flip mixers in kitchen/shower/vanity
 - SAA approved electrical fittings
 - Soft closing kitchen cabinets
 - Shower rail and rain maker head
 - Soft close toilet lid
 - Fibre cement (Mgo) flooring
 - Steel flashings for roof step and under walls
 - Provisions for washing machine/dishwasher
 - Aluminium windows and sliding door frames
 - Constructed from a 3mm gal steel frame
 - Option to leave the dividing bedroom wall out
 - Power connected by a 15 amp extension lead
 - White aluminium window trims with screens.

Due to continued product improvements, the images shown may vary slightly from the actual product. Decks, pergolas, trailers, furniture etc are not included.
